Torque-on-Demand(TOD) Transfer Case is a type of steering box used in four-wheel drive (4WD) or all-wheel drive (AWD) systems that dynamically adjusts the torque distribution between the front and rear wheels based on road and driving conditions. The main purpose of this system is to improve the vehicle's traction and stability in a variety of driving environments. This type of steering box is widely used in modern SUVs, crossovers, and some high-performance sedans, especially in those models that require excellent performance in a variety of driving conditions. With torque distribution on demand, the vehicle's performance is more flexible and efficient in different environments.
