## Abstracts

The global Touch Control Induction Hob market size is expected to reach \$ 5958 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

In 2025, global Touch Control Induction Hob production reached approximately 51.87 M Units. The average price is approximately \$75. Touch Control Induction Hob is an electromagnetic cooking appliance that uses electromagnetic induction heating technology as its core and employs a touch-screen human-machine interface for power and function adjustment. It is mainly used for countertop or built-in installations in home and commercial kitchens.

### Gross Profit Margin Levels

The gross profit margin of touch-screen induction cookers exhibits a clear 'brand and structural premium stratification': entry-level countertop models rely primarily on price elasticity and large-scale shipments, typically characterized by 'thin manufacturing margins + high channel efficiency.' High-end models, such as embedded multi-zone/high-power/integrated suction and exhaust systems, depend more on system premiums derived from glass panels, power devices (IGBT/SiC trend), coils and sensors, heat dissipation and EMC design, software algorithms, and overall system certification, allowing brands to achieve higher gross profit margins. Using the overall gross profit margin of large home appliance groups as an anchor point reveals a range: for example, Midea's overall gross profit margin in 2024 was around 26%, and Haier Smart Home's was around 27%. However, intense competition in North America and differences in product category structure may result in even lower overall gross profit margins for some groups. Therefore, in the touch-sensitive induction cooker segment, OEM/ODM and cost-effective brands typically have a gross profit margin of around 10%?20%, while mainstream brands and mid-to-high-end built-in models mostly fall between 20%?35%. High-end series with 'system integration (integrated suction and

exhaust/large-size flex zone/smart interconnection) + channel and brand strength' can reach a gross profit margin of 35%+ during peak seasons and structural upgrades (the specific margin depends on the region, channel commission rates, promotional intensity, and raw material cost cycles).

#### Industry Driving Factors

The core drivers of the growth of touch-sensitive induction cookers come from the convergence of three main lines: First, kitchen electrification and energy efficiency demands are driving users to migrate from gas/ceramic solutions to electromagnetic heating, which offers higher efficiency, faster response, and easier precise temperature control. Second, built-in installations and home decoration integration bring structural growth. The sale of pre-decorated apartments, kitchen appliance sets, and the synergistic sales of 'stove-steamer-baker-washer-range hood' systems have upgraded touch-sensitive induction cookers from single products to part of a kitchen system. Research institutions also generally point out that built-in models occupy a significant share in the induction cooker market and continue to expand. Third, product technology iterations (Flex Zone, sliding interaction, sensor-controlled temperature, interconnectivity and safety features, integrated suction and exhaust, etc.) continuously push 'usability' to 'better usability,' driving up ASP and demand for upgrades: for consumers, it means more intuitive operation and a more stable cooking experience; for channels and brands, it means clearer differentiated selling points and stronger premiumization potential, thus jointly supporting an industry growth rate of approximately 6% from 2025 to 2030.

This report studies the global Touch Control Induction Hob production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Touch Control Induction Hob and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Touch Control Induction Hob that contribute to its increasing demand across many markets.

#### **Highlights and key features of the study**

Global Touch Control Induction Hob total production and demand, 2021-2032, (K Units)

Global Touch Control Induction Hob total production value, 2021-2032, (USD Million)

Global Touch Control Induction Hob production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Units), (based on production site)

Global Touch Control Induction Hob consumption by region & country, CAGR, 2021-2032 & (K Units)

U.S. VS China: Touch Control Induction Hob domestic production, consumption, key domestic manufacturers and share

Global Touch Control Induction Hob production by manufacturer, production, price,

value and market share 2021-2026, (USD Million) & (K Units)

Global Touch Control Induction Hob production by Type, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

Global Touch Control Induction Hob production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Units)

This report profiles key players in the global Touch Control Induction Hob market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include BSH Hausger?te, Midea, Haier, Electrolux, Whirlpool, Samsung, LG Electronics, Ar?elik, Hisense, Panasonic, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Touch Control Induction Hob market

**Detailed Segmentation:**

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Units) and average price (US\$/Unit) by manufacturer, by Type, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

### **Key Questions Answered:**

1. How big is the global Touch Control Induction Hob market?
2. What is the demand of the global Touch Control Induction Hob market?
3. What is the year over year growth of the global Touch Control Induction Hob market?
4. What is the production and production value of the global Touch Control Induction

Hob market?

5. Who are the key producers in the global Touch Control Induction Hob market?

6. What are the growth factors driving the market demand?

### 1 SUPPLY SUMMARY

- 1.1 Touch Control Induction Hob Introduction
- 1.2 World Touch Control Induction Hob Supply & Forecast
  - 1.2.1 World Touch Control Induction Hob Production Value (2021 & 2025 & 2032)
  - 1.2.2 World Touch Control Induction Hob Production (2021-2032)
  - 1.2.3 World Touch Control Induction Hob Pricing Trends (2021-2032)
- 1.3 World Touch Control Induction Hob Production by Region (Based on Production Site)
  - 1.3.1 World Touch Control Induction Hob Production Value by Region (2021-2032)
  - 1.3.2 World Touch Control Induction Hob Production by Region (2021-2032)
  - 1.3.3 World Touch Control Induction Hob Average Price by Region (2021-2032)
  - 1.3.4 North America Touch Control Induction Hob Production (2021-2032)
  - 1.3.5 Europe Touch Control Induction Hob Production (2021-2032)
  - 1.3.6 China Touch Control Induction Hob Production (2021-2032)
  - 1.3.7 Japan Touch Control Induction Hob Production (2021-2032)
- 1.4 Market Drivers, Restraints and Trends
  - 1.4.1 Touch Control Induction Hob Market Drivers
  - 1.4.2 Factors Affecting Demand
  - 1.4.3 Touch Control Induction Hob Major Market Trends

### 2 DEMAND SUMMARY

- 2.1 World Touch Control Induction Hob Demand (2021-2032)
- 2.2 World Touch Control Induction Hob Consumption by Region
  - 2.2.1 World Touch Control Induction Hob Consumption by Region (2021-2026)
