Abstracts

The global Touchscreen LCD Room Thermostat market size is expected to reach \$ 1073 million by 2032, rising at a market growth of 5.9% CAGR during the forecast period (2026-2032).

In 2025, global production of touchscreen LCD room thermostats reached 10.34 million units, with an average selling price of \$68 per unit. Touchscreen LCD room thermostats are controllers used in room or zone air conditioning/terminal units (such as fan coil units (FCUs), VRF indoor units, split units, heat pump terminals, etc.). They feature a touchscreen LCD display to show set temperature, room temperature, mode (cooling/heating/dehumidifying/air supply), fan speed, timer, alarms, etc., and output control signals to the air conditioning terminal/controller via switch relays, 0–10V/PWM proportional output, or communication bus. They are used in residential communities, office buildings, hotels, factory workshops, warehouses, and small computer rooms. The upstream of the industry chain includes LCD modules (segment/dot matrix/color screens), backlights, touch layers, temperature sensors (NTC/digital thermometers), relays/SCRs/drivers, power modules (AC-DC/voltage regulators), antennas, and terminals; the midstream consists of manufacturers, with the production process including ODM/OEM design (hardware + firmware + UI) ? SMT/assembly ? calibration and aging ? certification (different regions/building control protocols) ? delivery; the downstream targets HVAC equipment manufacturers and building automation/room control system providers (hotels, offices), etc. Gross profit margins are approximately 15%–30%.
