Abstracts

The global Tourniquet market size is expected to reach \$ 1223 million by 2032, rising at a market growth of 2.4% CAGR during the forecast period (2026-2032).

A tourniquet is a constricting or compressing device, specifically a bandage, used to control venous and arterial circulation to an extremity for a period of time. Pressure is applied circumferentially upon the skin and underlying tissues of a limb; this pressure is transferred to the walls of vessels, causing them to become temporarily occluded. It is generally used as a tool for a medical professional in applications such as cannulation or to stem the flow of traumatic bleeding.

North America is the largest supplier and consumer of Tourniquet with a production market share of 35% and a consumption market share of 35%. The second place is Europe, following North America with the production market share of 24% and a consumption market share of 27%.

Market competition is not intense. BD, 3M, Fisher Scientific, Covidien, Zimmer, etc. are the leaders of the industry, with about 10% market share.
