The global Towed Boarding Stair market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In general, the market outlook for Towed Boarding Stairs is expected to be positive due to the rising demand for the aviation industry and the increasing need for safe and efficient boarding and deboarding processes for passengers. With the growing number of airports and airlines around the world, the demand for telescopic boarding stairs is likely to increase in the coming years. Additionally, advancements in technology are expected to improve the performance and safety of Towed Boarding Stairs, which could further drive the market growth.

The towed boarding stair, also known as a towable passenger boarding bridge or TPBB, is a mobile piece of equipment that enables passengers to board/deboard an aircraft parked at a remote stand (i.e. not connected to a gate). The TPBB is towed by a specialized vehicle to the vicinity of the aircraft and connected to it via a telescopic tunnel-like structure that provides a safe and secure means of passage for passengers. The TPBB is ideal for airports that lack sufficient gate facilities or for temporary remote operations.
