According to our (Global Info Research) latest study, the global Toxoplasma Gondii Recombinant Antigen market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Toxoplasma Gondii Recombinant Antigen is a protein produced by genetic engineering technology that mimics the natural antigen of Toxoplasma gondii. Toxoplasma gondii is a parasite that causes toxoplasmosis in humans and animals. Recombinant antigens are used in in vitro diagnostic reagents to detect immune responses caused by Toxoplasma infection, such as the presence of antibodies. By using recombinant antigens, the specificity and sensitivity of diagnosis can be improved and cross-reactions and non-specific reactions can be reduced.
