The global Toy Testing and Certification market size is expected to reach \$ 4420.9 million by 2029, rising at a market growth of 5.9% CAGR during the forecast period (2023-2029).

The toy testing and certification market is expected to grow significantly in the coming years, driven by a number of factors, including:

Increasing demand for safe toys: Parents are becoming more aware of the importance of toy safety, and they are demanding toys that have been tested and certified to meet safety standards.

Growing popularity of online toy purchases: Online toy purchases are becoming increasingly popular, and this is driving the need for toy testing and certification. Online retailers need to be sure that the toys they are selling are safe, and they can achieve this by requiring their suppliers to have their toys tested and certified.

Expanding toy markets: The toy market is expanding in developing countries, such as China and India. This is driving the need for toy testing and certification services in these countries.

Stringent government regulations: Governments around the world are implementing increasingly stringent toy safety regulations. This is driving the need for toy manufacturers to have their toys tested and certified to ensure compliance with these regulations.

The Asia Pacific region is expected to be the largest market for toy testing and

certification services, followed by North America and Europe. The growth of the market in the Asia Pacific region is being driven by the increasing demand for safe toys in countries such as China and India.

Overall, the toy testing and certification market is expected to grow significantly in the coming years, driven by increasing demand for safe toys, growing popularity of online toy purchases, expanding toy markets, and stringent government regulations.

Toy testing and certification is the process of ensuring that toys meet safety standards and are appropriate for the age group they are intended for. Toy testing is typically conducted by independent laboratories, while toy certification is typically granted by government agencies or accredited third-party organizations.
