Abstracts

TPE (Thermoplastic Elastomer) is a thermoplastic elastomer material with the characteristics of high strength, high resilience, injection molding processability, wide range of applications, environmental protection, non-toxic and safe, and excellent colorability. Compared with the traditional leather large foot pads that use splicing and synthetic manufacturing processes, TPE foot pads can be injection molded in one mold, eliminating the use of additives such as glue, so that the foot pad materials are not affected by foreign objects, so there is no odor and no irritation to the human body.
