According to our (Global Info Research) latest study, the global TPEE market size was valued at USD 917.8 million in 2023 and is forecast to a readjusted size of USD 1163.4 million by 2030 with a CAGR of 3.4% during review period.

Thermoplastic Polyester Elastomer (TPEE) is a block copolymer who contains a hard segment of polyester and a soft segment of polyether; wherein the amorphous is formed from the soft segment of polyether and the uncrystallized polyester. Micro-crystals play a role as physical crosslinking points formed from the hard segment of the polyester. Thermoplastic polyester elastomer has the rubber elasticity and strength of engineering plastics. Soft segment gives it flexibility to make it like rubber; hard segment assigns the processing properties which makes it like plastic. Compared with rubber, it has a better processing performance and longer life; and the same high strength characteristics compared to plastic, while the flexibility and dynamic mechanical properties is better.

Global TPEE (Thermoplastic Ester Elastomer) key players include DuPont, Celanese, DSM, Taiwan Changchun, etc. Global top four manufacturers hold a share over 50%.

Europe is the largest market, with a share about 42%, followed by China, and North America,????????????????????
