## Abstracts

A tracheostomy 15mm connector refers to a specific medical device used in the management and care of patients with tracheostomies. A tracheostomy is a surgical procedure where an opening is created in the neck to directly access the trachea (windpipe), typically to assist with breathing. The 15mm connector is a standardized part of the tracheostomy care system. It is designed to connect various components of the tracheostomy apparatus, such as the tracheostomy tube, humidification system, or ventilator circuit. The 15mm measurement refers to the diameter of the connector, which is a standard size used in many medical devices and accessories.
