Track-mounted Mobile Impact Crushers are a type of mobile crushing equipment used in various industries, including mining, construction, and recycling.

These crushers are designed to crush materials through a horizontal impact crushing process, producing high-quality and consistent cubical-shaped end products. The 'track-mounted' aspect refers to the crushers being mounted on tracks or crawler systems, allowing for easy movement from one location to another within a work site or between different job sites. Track-mounted impact crushers are highly mobile and can be easily transported to different job sites. Their track or crawler systems provide excellent maneuverability, making them suitable for both primary and secondary crushing tasks.
