Abstracts

Tractor auto steer is a technology that enables automated steering and navigation of agricultural tractors and other farm machinery. It utilizes GPS (Global Positioning System) or GNSS (Global Navigation Satellite System) technology to accurately determine the vehicle's position within the field. By integrating with the tractor's steering system, auto steer systems can automatically adjust the vehicle's direction, allowing for precise and repeatable driving paths. This technology enhances efficiency in agricultural operations by reducing overlap, minimizing driver fatigue, and enabling more precise application of inputs such as planting, spraying, and harvesting. Tractor auto steer systems contribute to improved productivity, cost savings, and environmental sustainability in modern farming practices.
