Abstracts

According to our (Global Info Research) latest study, the global Trade Finance market size was valued at US\$ 8729260 million in 2024 and is forecast to a readjusted size of USD 12459320 million by 2031 with a CAGR of 5.3% during review period.

Trade finance signifies financing for trade, and it concerns both domestic and international trade transactions. A trade transaction requires a seller of goods and services as well as a buyer. Various intermediaries such as banks and financial institutions can facilitate these transactions by financing the trade.

While a seller (or exporter) can require the purchaser (an importer) to prepay for goods shipped, the purchaser (importer) may wish to reduce risk by requiring the seller to document the goods that have been shipped. Banks may assist by providing various forms of support. For example, the importer's bank may provide a letter of credit to the exporter (or the exporter's bank) providing for payment upon presentation of certain documents, such as a bill of lading. The exporter's bank may make a loan (by advancing funds) to the exporter on the basis of the export contract.

Other forms of trade finance can include documentary collection, trade credit insurance, finetrading, factoring or forfaiting. Some forms are specifically designed to supplement traditional financing.

Secure trade finance depends on verifiable and secure tracking of physical risks and events in the chain between exporter and importer. The advent of new information and communication technologies allows the development of risk mitigation models which have developed into advance finance models. This allows very low risk of advance payment given to the Exporter, while preserving the Importer's normal payment credit

terms and without burdening the importer's balance sheet. As trade transactions become more flexible and increase in volume, demand for these technologies has grown.

Global key players of trade finance include BNP Paribas, Bank of China, etc. Global top 3 companies hold a share over 10%. Europe is the largest market, with a share about 40%, followed by Asia Pacific and North America with the share about 30% and 20%. In terms of product, letters of credit is the largest segment, with a share over 40%. And in terms of application, the largest application is energy industry, with a share about 30%.
