According to our (Global Info Research) latest study, the global Traditional Chinese Medicine Clarification Tube Centrifuge market size was valued at US\$ 52.2 million in 2024 and is forecast to a readjusted size of USD 69.1 million by 2031 with a CAGR of 4.1% during review period.

The Chinese medicine clarification tubular centrifuge is one of the tubular separator series, specially designed for the Chinese medicine products industry and the plant extraction industry. The Chinese medicine clarification tubular centrifuge is mainly used for liquid clarification and solid particle enrichment, or liquid-solid separation. It can effectively separate impurities in the liquid and make the liquid clear. This model is particularly suitable for processing suspensions such as Chinese medicine extracts with low concentration, high viscosity, fine solid particles and small solid-liquid specific gravity difference. Through centrifugal separation, the sedimentation time can be shortened, the production efficiency can be improved, and at the same time, the active ingredients in the medicine are not lost, and the clarity and output of the product are improved.
