The global Traditional Chinese Medicine Processing Equipment market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Traditional Chinese medicine processing is a unique pharmaceutical technology based on the theory of traditional Chinese medicine and based on the different requirements of clinical medication needs and the properties of the medicinal materials themselves. Processing methods include three main methods: cleaning, cutting and roasting, as well as other methods such as boiling, frosting (removing oil to make frosting), water flying and so on.

Traditional Chinese medicine processing equipment refers to unique traditional Chinese medicine pharmaceutical equipment that processes Chinese medicinal materials into Chinese medicine pieces. Traditional Chinese medicine processing equipment is mainly divided into three categories: purification, cutting and roasting equipment. Purification equipment refers to equipment that cleanly selects, processes, and removes impurities from Chinese medicinal materials, including cleaning machines, air separators, and crushing equipment. Cutting equipment refers to equipment that cuts Chinese medicinal materials into different forms according to preparation requirements, including moistening machines, medicine cutting machines, etc. Braising equipment involves frying, broiling, forging, steaming, boiling, stewing, simmering, charcoal making, frost making and other processes, including medicine frying machines, drying equipment, etc.
