The global Trailer Mounted Dynamic Signs market size is expected to reach \$ 260 million by 2032, rising at a market growth of 5.5% CAGR during the forecast period (2026-2032).

In 2025, global Trailer Mounted Dynamic Signs production reached approximately 22352 Units, with an average global market price of around 7796 USD per Unit.

Trailer Mounted Dynamic Signs are portable electronic traffic signs used to display changeable traffic information, warnings, guidance messages, symbols, arrows, and speed-related alerts in temporary or movable road environments. They are typically deployed for road construction, lane closures, highway maintenance, traffic incidents, emergency response, public events, parking guidance, and temporary traffic control. In practical industry use, Trailer Mounted Dynamic Signs may be mounted on towable trailers, vehicles, portable frames, or temporary roadside platforms. The most common form is the trailer-mounted variable message sign, which integrates an LED display, trailer chassis, solar panels, batteries, control system, communication module, GPS positioning, and sometimes radar speed detection or camera monitoring.

Trailer Mounted Dynamic Signs, with their unique advantages of flexible deployment, no need for fixed civil engineering, remote wireless information updates, and self-powered long-term operation, precisely address the industry pain points of traditional traffic information equipment, such as fixed installations, delayed deployment, reliance on mains power, and slow emergency response. They effectively fill information dissemination gaps in scenarios such as temporary traffic control, road construction, and emergency rescue, balancing practicality and convenience. Driven by the continuous advancement of smart transportation construction, the normalization of

temporary traffic management needs, and the continuous improvement of emergency response systems, coupled with the trend of infrastructure upgrades and the widespread adoption of digital traffic control in various regions, their application scenarios will continue to expand, and market demand will steadily increase.

The upstream raw materials for Trailer Mounted Dynamic Signs mainly include steel structural components, LED displays, controllers, lithium batteries, and solar panels. Typical suppliers include Baowu Steel, ArcelorMittal, Nippon Steel Corporation, BOE, Samsung Electronics, CATL, etc. The downstream applications are mainly for traffic guidance and control on urban roads and highways, and the customers are mainly road traffic management departments of various countries.

The production capacity of a single production line for Trailer Mounted Dynamic Signs varies considerably depending on the company size, the level of automation of the production line, and the type and function of the products, typically ranging from several hundred to several thousand units. The industry's gross profit margin is usually in the range of 30%-40%.
