According to our (Global Info Research) latest study, the global Trampoline Fabrics market size was valued at US\$ 119 million in 2024 and is forecast to a readjusted size of USD 183 million by 2031 with a CAGR of 6.3% during review period.

Trampoline fabrics are specialized, high-strength materials designed to provide elasticity, durability, and safety for use in trampolines. Typically made from woven polypropylene or nylon, these fabrics are tightly constructed to create a surface that is both resilient and tear-resistant, ensuring long-lasting performance under repetitive stress. The material is non-stretch in itself but relies on the trampoline's springs or elastic bands to provide the bounce. Additionally, trampoline fabrics are often UV-resistant and weatherproof to withstand outdoor conditions, and they feature a smooth finish to minimize abrasions and enhance user comfort.
