Abstracts

The global Transaction Regulatory Reporting Solutions market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Transaction reporting is demanded of financial institutions by multiple regulatory regimes, with the goal of detecting suspected market abuse or money laundering. To comply, firms need to ensure their systems are able to deliver complete and accurate information about the financial instrument traded, the firm undertaking the trade, the buyer and seller, and the date and time of the trade to be reported to the regulatory authority.

Transaction reporting is not to be confused with trade reporting, which is conducted in real time for the purpose of ensuring transparency and fairness in the market and made public, while transaction reporting can be done in T+1 days and the information is not made public.

Transaction reporting software solutions are crucial to complying with several capital markets regulations, such as MiFID II/MiFIR, EMIR, REMIT and SFTR in the UK and Europe; CAT/OATS and CFTC reporting in the US; and regulations mandated by MAS, ASIC and HKMA in the APAC region.

This report studies the global Transaction Regulatory Reporting Solutions demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Transaction Regulatory Reporting Solutions, and provides market size (US\$ million) and

Year-over-Year (YoY) growth, considering 2023 as the base year. This report explores demand trends and competition, as well as details the characteristics of Transaction Regulatory Reporting Solutions that contribute to its increasing demand across many markets.
