## Abstracts

According to our (Global Info Research) latest study, the global Transient Limiters market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Transient Limiters protect EMI receivers and spectrum analyzers from transients or random fluctuations in energy. As part of EMC testing, energy pulses are often injected into EMI receivers and similar electromagnetically sensitive devices, with the result that they can be damaged by strong feedback. A transient limiter is an accessory that limits the power delivered to the EMI receiver, protecting it from the damaging effects of EMI.
