Abstracts

The global Transmission Smoke Meter market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The transmission smoke meter is an instrument for measuring the smoke in the exhaust gas of automobiles. It is mainly used for the determination of exhaust gas from diesel engines. Use a piston pump to extract a certain volume of exhaust gas from the exhaust pipe of the diesel engine according to the specified time, and make it pass through a certain area of filter paper. The smoke particles in the exhaust gas will be trapped on the filter paper and make the filter paper black.
