The global Transmission Solenoid Valve Magnetic Cover market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Transmission solenoid valve magnetic cover is a component of a solenoid valve that is used to control the flow of fluid in an automatic transmission system. A solenoid valve is a kind of electromagnetic control device that relies on the electromagnetic force generated by the power coil to drive the valve core and open and close the valve?. A magnetic cover is added to the solenoid valve to block the magnetic flux leakage line, increase the magnetic induction strength of the iron core and the valve head, reduce the leakage magnetic flux, and optimize the structure
