Abstracts

The global Transparent Modified Nylon market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Nylon is a semi-crystalline polymer and most nylons have a white translucent appearance. For example, PA6 has a yellowish translucent appearance, PA66 has a white translucent appearance, and PA610 has a milky translucent appearance. Transmittance is usually between 50-80%. However, Transparent Modified Nylon is a special type of nylon that has a high light transmittance of 90% or more, which is close to the transparency of polymethylmethacrylate (PMMA) and better than polycarbonate (PC).

Transparent modified nylon is an amorphous or microcrystalline thermoplastic nylon with numerous excellent performance characteristics. It has excellent tensile strength, impact strength, hardness, abrasion resistance, chemical resistance, and surface hardness. In addition, transparent nylon has low water absorption, low coefficient of friction, high specific heat, good dielectric properties, light weight, good impact resistance, excellent corrosion resistance, abrasion resistance, and long service life.

Transparent modified nylon can be modified by physical and chemical methods. Physical method is to add nucleating agents, so that the grain size is reduced to the visible wavelength range, to obtain microcrystalline transparent nylon. Chemical method is the introduction of monomers containing side groups or ring structure, destroying the molecular chain regularity, to get amorphous transparent nylon.

Transparent modified nylon has a wide range of applications. Due to its excellent performance and non-toxic and odorless characteristics, transparent nylon is widely

used in food and beverage packaging, medical devices, precision instruments, optical instruments, electronic and electrical appliances, automobile manufacturing, machinery, aviation, sporting goods and other fields.

This report studies the global Transparent Modified Nylon production, demand, key manufacturers, and key regions.
