Abstracts

Transport refrigeration units are used to control the environment of temperature-sensitive products transported in trucks, vans or any carrier vehicle as well as in marine/intermodal containers. Refrigerated transportation is a method of climate controlled transportation, which is specifically designed to ship products that require a cool or frozen temperature to stay fresh for delivery to the market. Products like frozen fruits and vegetables, frozen seafood or meat, plants, chemicals, pharmaceuticals, and agricultural products require a temperature controlled environment to sustain the transit.

SCOPE OF THE REPORT:

This report focuses on the Transport Refrigeration Units in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The shift in consumers' preferences, from the basic brick and mortar shops to online sites, has significantly contributed to the growth of transport refrigeration units. Owing to technological advancements and the rising competition among grocers, there is a significant shift in the consumers' needs and expectations in the grocery retail sector. In India, Bigbasket and Grofers have become popular for their wide range of groceries available for online shopping. The Bigbasket online store has a wide range of products from staples, vegetables, meat, fish, gourmet items, and household goods to personal care items. Owing to the convenience in online shopping, the e-grocery market is witnessing significant growth. This rise in the e-commerce sector for groceries simultaneously increases the demand for refrigerated transportation to deliver perishable goods, subsequently driving the demand for transport refrigeration units market.

North America is estimated to be the major revenue contributor to the transport refrigeration units market throughout the forecast period. The increasing demand for processed foods and pharmaceuticals coupled with investments towards the expansion of cold supply chain, will drive the growth of the transport refrigeration units market in North America.

The worldwide market for Transport Refrigeration Units is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
