Date: August 2019

Pages: 117

Price: US\$ 3,480.00 (Single User License)

ID: GDF7ED3639DEN

## Abstracts

Trash pumps are portable pumps and are typically for dewatering applications. Trash pumps are designed to pump large amounts of water that contains hard and soft solids such as mud, leaves, twigs, sand, and sludge. Most devices are portable, heavy-duty centrifugal pumps that feature deeper impeller vanes and larger discharge openings than other pumps. Trash pumps, which are capable of processing materials with suspended particulates that would clog other centrifugal pumps, can move hundreds or even thousands of gallons per minute. Trash pumps do not grind up the materials that enter the pump.

### SCOPE OF THE REPORT:

The worldwide market for Trash Pumps (Engines
