Abstracts

The global Travel Luggage Bag market size is expected to reach \$ 15403 million by 2032, rising at a market growth of 4.9% CAGR during the forecast period (2026-2032).

Travel suitcases are box-type storage products designed for medium- to long-distance travel. They typically feature a pull handle and wheels, offering strong load-bearing capacity, protection, and organized storage capabilities. Suitable for both checked and carry-on baggage, they meet diverse travel needs.

Upstream suppliers primarily include raw materials and components such as PC/ABS, aluminum-magnesium alloy, fabrics, zippers, wheels, pull handles, locks, and hardware accessories. Downstream suppliers mainly target business travelers, leisure travelers, e-commerce platforms, offline retail channels, and corporate group purchases.

The global travel suitcase market has an average price of \$70 per unit, with annual sales of approximately 153 million units and a global annual production capacity of about 300-400 million units. The industry profit margin is 25%.

The future travel suitcase market will benefit from the global tourism recovery and increased travel frequency. Products will continue to develop towards lightweight, durable, environmentally friendly materials, and aesthetically pleasing designs. Simultaneously, intelligent functions such as GPS tracking, anti-theft features, and charging ports will become increasingly common. Specialized scenarios such as carry-on suitcases, business suitcases, and family travel suitcases will continue to deepen, and brand competition will shift from price to a comprehensive contest of design, functionality, and channel operation capabilities.
