According to our (Global Info Research) latest study, the global Tree Insect and Disease Management Service market size was valued at US\$ 268 million in 2025 and is forecast to a readjusted size of US\$ 373 million by 2032 with a CAGR of 4.8% during review period.

Tree insect and disease management service refers to a range of professional services provided to protect trees from various insect infestations and diseases. These services are aimed at maintaining the health and vitality of trees by controlling or eliminating pests and pathogens that can cause damage. Tree insect and disease management services are typically provided by arborists, tree care companies, and some landscape companies. The cost of the service can vary depending on the size of the tree, the extent of the infestation or disease, and the specific treatments required.

The tree insect and disease management service industry sees accelerating popularity of green biological prevention and control, intelligent pest monitoring with drones and sensor technology, growing market demand for standardized regular maintenance and one-stop full lifecycle tree protection services; opportunities come from expanding urban greening construction, policy-driven ancient and famous tree protection, rising landscape maintenance demand from communities and enterprises, and booming private courtyard greening needs, while challenges include stricter environmental regulation of chemical pesticides, shortage of professional technical talents, regional differences in pest types leading to difficult standardized service formulation, and seasonal business volatility affecting stable operation.

This report is a detailed and comprehensive analysis for global Tree Insect and Disease

Management Service market. Both quantitative and qualitative analyses are presented by company, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Tree Insect and Disease Management Service market size and forecasts, in consumption value (\$ Million), 2021-2032

Global Tree Insect and Disease Management Service market size and forecasts by region and country, in consumption value (\$ Million), 2021-2032

Global Tree Insect and Disease Management Service market size and forecasts, by Type and by Application, in consumption value (\$ Million), 2021-2032

Global Tree Insect and Disease Management Service market shares of main players, in revenue (\$ Million), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Tree Insect and Disease Management Service

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Tree Insect and Disease Management Service market based on the following parameters - company overview, revenue, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Tree Doctors, STERLING TREE & LAWN, BESWICK TREE SERVICE, Arborcorp, Bartlett Tree Experts, Davey, ANY HEIGHT TREE SERVICES, Upper Canada Tree Services, Grounds Guys, Treescape,

etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.
