Abstracts

The global Tree Insect and Disease Management Service market size is expected to reach \$ 373 million by 2032, rising at a market growth of 4.8% CAGR during the forecast period (2026-2032).

Tree insect and disease management service refers to a range of professional services provided to protect trees from various insect infestations and diseases. These services are aimed at maintaining the health and vitality of trees by controlling or eliminating pests and pathogens that can cause damage. Tree insect and disease management services are typically provided by arborists, tree care companies, and some landscape companies. The cost of the service can vary depending on the size of the tree, the extent of the infestation or disease, and the specific treatments required.

The tree insect and disease management service industry sees accelerating popularity of green biological prevention and control, intelligent pest monitoring with drones and sensor technology, growing market demand for standardized regular maintenance and one-stop full lifecycle tree protection services; opportunities come from expanding urban greening construction, policy-driven ancient and famous tree protection, rising landscape maintenance demand from communities and enterprises, and booming private courtyard greening needs, while challenges include stricter environmental regulation of chemical pesticides, shortage of professional technical talents, regional differences in pest types leading to difficult standardized service formulation, and seasonal business volatility affecting stable operation.

This report studies the global Tree Insect and Disease Management Service demand, key companies, and key regions.

This report is a detailed and comprehensive analysis of the world market for Tree Insect and Disease Management Service, and provides market size (US\$ million) and Year-over-Year (YoY) growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Tree Insect and Disease Management Service that contribute to its increasing demand across many markets.

Highlights and key features of the study
