Abstracts

According to our (Global Info Research) latest study, the global Triallylamine market size was valued at US\$ 48.62 million in 2025 and is forecast to a readjusted size of US\$ 65.91 million by 2032 with a CAGR of 4.5% during review period.

In 2024, global triallylamine production was approximately 6,500 tons, with an average selling price of about US\$6,950 per ton. Production capacity in 2024 was 8,300 tons, with an average gross profit margin of approximately 20-30%. Triallylamine is an organic nitrogen-containing tertiary amine, a colorless liquid with an ammonia odor at room temperature. It is strongly alkaline, reacts with acids, is slightly soluble in water but readily soluble in organic solvents, and is an important intermediate in uranium and rare metal extraction, resin modification, organic synthesis, and ion exchange resin manufacturing.

The core upstream raw materials for triallylamine are propylene and liquid ammonia, which are produced through a high-pressure amination reaction under the action of a catalyst. Its downstream applications are highly concentrated in the functional materials field, mainly including: as an organic synthesis intermediate, used in the production of quaternary ammonium salts, specialty surfactants, and pharmaceutical/pesticide molecules; as a resin modifier, used to improve its heat resistance, adhesion, and mechanical properties; and as a polymer crosslinking agent, its core application is in constructing three-dimensional network structures in ion exchange resins, UV-curable coatings, and sealants, endowing materials with stable chemical properties and strength.

This report is a detailed and comprehensive analysis for global Triallylamine market. Both quantitative and qualitative analyses are presented by manufacturers, by region &

country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2025, are provided.

Key Features:

Global Triallylamine market size and forecasts, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Triallylamine market size and forecasts by region and country, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Triallylamine market size and forecasts, by Type and by Application, in consumption value (\$ Million), sales quantity (Tons), and average selling prices (US\$/Ton), 2021-2032

Global Triallylamine market shares of main players, shipments in revenue (\$ Million), sales quantity (Tons), and ASP (US\$/Ton), 2021-2026

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Triallylamine

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Triallylamine market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Shandong Luyue Chemical, Wuhan UCchem Biotechnology, Zouping Tongfeng Chemical, Wuhan Jiyesheng Chemical, Zhejiang Xinhua Chemical,

Zouping Mingxing Chemical, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

Triallylamine market is split by Type and by Application. For the period 2021-2032, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type
