## Abstracts

According to our (Global Info Research) latest study, the global Triazine market size was valued at USD 415.1 million in 2023 and is forecast to a readjusted size of USD 489.8 million by 2030 with a CAGR of 2.4% during review period.

A triazine is class of nitrogen-containing heterocycles. The parent molecules' molecular formula is  $C_3H_3N_3$ . They exist in three isomeric forms, 1,3,5-triazines being common.

MMA Triazine is a cyclic tertiary triamine. It is mainly used as a scavenger for sour gases like  $H_2S$  and mercaptans in gaseous or liquid hydrocarbon streams.

MEA-triazine is the most commonly used chemistry for applications requiring a non-regenerative  $H_2S$  scavenger. Other chemistries are available (MMA-triazine, glyoxal, zinc-based, iron-based, and others) but MEA-triazine has the highest market share because it is the lowest cost in use solution. Triazines are low cost in use despite the fact that the molar efficiency of the chemistry in capturing  $H_2S$  is significantly below theoretical maximum efficiency.

North America is the major market for triazine, accounting for over 40% of the market share. Europe is next with about 25%.

Hexion, Eastman, Baker Hughes, Sintez Oka and others are the major players, with the top three accounting for about 20% of the market.

The Global Info Research report includes an overview of the development of the Triazine industry chain, the market status of Medical Industry (1,3,5-triazine, 1,2,3-triazine), Biological Energy Industry (1,3,5-triazine, 1,2,3-triazine), and key

enterprises in developed and developing market, and analysed the cutting-edge technology, patent, hot applications and market trends of Triazine.

Regionally, the report analyzes the Triazine markets in key regions. North America and Europe are experiencing steady growth, driven by government initiatives and increasing consumer awareness. Asia-Pacific, particularly China, leads the global Triazine market, with robust domestic demand, supportive policies, and a strong manufacturing base.
