The global Tripolar Concentric Ring Electrode (TCRE) market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

TCRE is the abbreviation for tripolar concentric ring electrode. The invention of the TCRE represents a significant and radical improvement in the electrode design. Each TCRE consists of three electrode elements: the outer ring, the middle ring, and the center disc. The TCRE is distinctively different from the disc electrode which has a single element. The outer ring of the TCRE provides disc electrode biopotentials emulation.
