The trough type texturing cleaning equipment is a cleaning equipment specially used in the texturing process of silicon wafer surface, and is mainly used in the solar photovoltaic industry. Texturing is to form a tiny pyramid-shaped velvet structure on the surface of the silicon wafer through chemical treatment, thereby increasing the light absorption efficiency and improving the conversion efficiency of solar cells. In the texturing process, some chemicals and particles will remain on the surface of the silicon wafer, so cleaning is an essential step.
