According to our (Global Info Research) latest study, the global Truck Electric Power Steering System market size was valued at US\$ 1027 million in 2025 and is forecast to a readjusted size of US\$ 1271 million by 2032 with a CAGR of 3.1% during review period.

A Truck Electric Power Steering System is an advanced steering system designed for trucks and other heavy-duty vehicles that uses electric power assistance to aid in steering. Unlike traditional hydraulic power steering systems that rely on hydraulic fluid and a pump, electric power steering (EPS) systems use an electric motor to provide steering assistance, making the steering process smoother and more efficient.

The automotive industry was experiencing a growing trend toward electric and hybrid vehicles. Hyundai Mobis, as part of the Hyundai Motor Group, was likely investing in developing components and systems for electric powertrains, batteries, and other eco-friendly technologies to support the group's electric vehicle initiatives.
