Truck hoppers are large containers that are mounted on trucks or trailers and used for transporting and storing bulk materials such as grain, feed, fertilizer, or other dry goods. They have a large capacity and are equipped with a sliding door or hatch at the bottom that allows for easy loading and unloading of materials.

Truck hoppers are frequently utilized in the construction industry for material transport. These hoppers allow for the loading of various materials, necessitating adjustments to suit each specific type. Adjustments might include altering the angle of the hopper, modifying the height of the inlet, reducing the size of the discharge opening, and making other changes to accommodate the unique characteristics of the material being transported.
