Abstracts

Truck platooning is the linking of two or more trucks in convoy, using connectivity technology and automated driving support systems. These vehicles automatically maintain a set, close distance between each other when they are connected for certain parts of a journey, for instance on motorways. The truck at the head of the platoon acts as the leader, with the vehicles behind reacting and adapting to changes in its movement requiring little to no action from drivers. In the first instance, drivers will remain in control at all times, so they can also decide to leave the platoon and drive independently.

Scope of the Report:

This report focuses on the Truck Platooning Systems in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. Truck platooning will be possible only if many parties join forces. Numerous different issues are involved: reliably automated vehicles, the technology to enable trucks to communicate with each other and with the infrastructure, legislation, human behaviour, public acceptance, liability and insurance.

In 2020, Level 2 and 3 platooning is expected to enter the market. Every new truck being produced is mandated to have advanced safety systems (sensors, cameras, electronic controls, and stability) installed, thus enabling proliferation of autonomous driving technologies.

The United States and Japan is expected to lead the truck platooning market followed

by Europe. Asian countries such as China are also expected to enter the market. The European market is a mature automotive market and holds high potential for the truck platooning system market. The region is well placed in terms of smart mobility and developed ICT infrastructure and with the implementation of favorable regulatory mandates

The worldwide market for Truck Platooning Systems is expected to grow at a CAGR of roughly xx% over the next five years, will reach xx million US\$ in 2023, from xx million US\$ in 2017, according to a new GIR (Global Info Research) study.
