According to our (Global Info Research) latest study, the global Trunking System market size was valued at USD 137.7 million in 2023 and is forecast to a readjusted size of USD 207.4 million by 2030 with a CAGR of 6.0% during review period.

Trunking System here refers to LED Trunking Systems. Trunking System is an energy-efficient, low maintenance alternative to traditional linear fluorescent in a variety of industrial, commercial and light assembly applications. It is the optimal solution for conventional lighting systems and also excellent for new installations due to its low installation cost ? everything in one box and installation is tool-less. It saves both time and costs when updating lighting systems. LED trunking system distributes the elegant and uniform light according to different applications like supermarket, retail places, warehouses, offices, lecture halls, play courts, gymnasium, workshops, car parks etc.

Philips accounted for 19% of the global Trunking System revenue market share. Followed players, GE lighting accounted for 10%, Havells Sylvania (Shanghai Feilo Acoustics) accounted for 6%.

Global giant manufactures mainly distributed in Europe. They have unshakable status in this field. The key product markets locate at Europe. Europe takes the market share of 49%.
