## Abstracts

The global Tryptophan market size is expected to reach \$ 1274 million by 2032, rising at a market growth of 9.5% CAGR during the forecast period (2026-2032).

Tryptophan (symbol Trp or W) is an  $\alpha$ -amino acid that is used in the biosynthesis of proteins. Tryptophan contains an  $\alpha$ -amino group, an  $\alpha$ -carboxylic acid group, and a side chain indole, making it a non-polar aromatic amino acid. It is essential in humans, meaning the body cannot synthesize it; it must be obtained from the diet. Tryptophan is also a precursor to the neurotransmitter serotonin, the hormone melatonin and vitamin B3. It is encoded by the codon UGG.

Only the L-stereoisomer tryptophan has the function of constructing or enzymatically active proteins, and the R-stereoisomer is occasionally found in naturally occurring peptides.

Global Tryptophan key players include CJ, Ajinomoto, Henan Julong, Meihua Group, Evonik, etc. Global top five manufacturers hold a share over 70%. Europe is the largest market, with a share over 40%, followed by Asia-Pacific and North America, both have a share about 55%. In terms of product, 98% Tryptophan is the largest segment, with a share over 95%. And in terms of application, the largest application is Animal Feed, followed by Food and Beverage, Healthcare.

This report studies the global Tryptophan production, demand, key manufacturers, and key regions.
