Abstracts

The global Tuna Oil Softgel Capsules market size is expected to reach \$ 1451 million by 2032, rising at a market growth of 5.7% CAGR during the forecast period (2026-2032). In 2024, global annual production capacity for tuna oil softgel capsules reached approximately 75 million bottles, while actual production was around 63.6 million bottles. The global average market price was US\$13.4 per bottle, and the gross profit margin for major manufacturers ranged between 27% and 42%. Tuna oil softgel capsules are dietary supplements made from purified tuna fish oil rich in omega-3 fatty acids, primarily DHA and EPA. These capsules help support cardiovascular health, cognitive function, eye development, and inflammation control, offering a stable and convenient delivery form.

Upstream includes tuna fishing fleets, fish-processing plants, crude tuna oil extractors, molecular distillation equipment suppliers, gelatin and glycerin producers. Midstream consists of refined tuna oil manufacturers, EPA/DHA concentration processors, softgel encapsulation factories, and nutraceutical packaging companies. Major producers are located in Southeast Asia, Japan, and Northern Europe. Downstream markets include pharmacies, health food brands, infant nutrition companies, online supplement retailers, and cardiovascular health product distributors. End customers focus on DHA/EPA concentration levels, heavy-metal purification (e.g., mercury), fishy odor removal, and certifications such as IFOS, MSC, and GMP.

The market for tuna oil softgel capsules continues to expand as consumers increasingly prioritize cardiovascular and cognitive health. DHA-rich formulations remain particularly popular among pregnant women, students, and seniors. Advances in molecular distillation and deodorization technologies have also improved purity and reduced fishy odor, boosting consumer adoption. Sustainability concerns, such as marine resource protection and traceability, are shaping purchasing behavior, favoring brands with MSC or IFOS certification. Although competition from algae oil and krill oil is increasing, tuna

oil maintains strong market demand due to its balanced DHA/EPA profile and lower cost. Over the next few years, growth will be driven by premiumization, clean-label formulations, and expanding e-commerce distribution.
