According to our (Global Info Research) latest study, the global Tunable Pulse Stretcher market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

Tunable Pulse Stretcher is a compact, robust and cost-effective solution to control pulse durations in ultrafast laser systems using a diffraction grating (Treacy) compressor. It guarantees optimal peak power and dynamic and precise pulse control in any circumstance. It improves laser performance by compensating the misalignment of the diffraction grating compressor and the amplifier self-phase modulation (SPM), and contributes to forming the smallest stretcher-compressor pair in the industry.
