According to our (Global Info Research) latest study, the global Tungsten Alloy Prefabricated Fragments market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

Tungsten alloy prefabricated fragments are generally used in landmines, grenades and other ammunition to kill the living force. Generally cylindrical or spherical. Because prefabricated fragments have a negative effect on the structure of the projectile, they are usually only used in low-pressure artillery ammunition, such as mortars and large-caliber grenades. The most common applications are aerial bombs, grenades, mines, etc.
