Abstracts

The global Tungsten Alloy Prefabricated Fragments market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Tungsten alloy prefabricated fragments are generally used in landmines, grenades and other ammunition to kill the living force. Generally cylindrical or spherical. Because prefabricated fragments have a negative effect on the structure of the projectile, they are usually only used in low-pressure artillery ammunition, such as mortars and large-caliber grenades. The most common applications are aerial bombs, grenades, mines, etc.

This report studies the global Tungsten Alloy Prefabricated Fragments production, demand, key manufacturers, and key regions.
