A tunnel boring machine (TBM) is a machine used to excavate tunnels with a circular cross section through a variety of soil and rock strata. They may also be used for micro tunneling. In Japan and China, The machines used for soil are called shield tunneling machines and machines used for hard rock are called tunnel boring machine. But in Europe and USA, they are called the same name tunnel boring machine. The research we did include all of them.

Scope of the Report:

This report focuses on the Tunnel Boring Machine in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

In recent years, international manufacturers of Tunnel Boring Machine (TBM) have cooperation with Chinese enterprises and China has become the world's largest TBM manufacturer which occupied more than 45.27% of production in total in 2015.

At present, in the foreign industrial developed countries the Tunnel Boring Machine (TBM) industry is generally at a more advanced level. In Japan, Europe and the United States manufacturer of TBM still has a considerable size.
