## Abstracts

According to our (Global Info Research) latest study, the global Tunnel Magnetometer market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

A tunnel magnetometer is a sensor that uses the tunnel magnetoresistance effect to measure the strength and direction of the magnetic field. The tunnel magnetoresistance effect refers to the situation where a very thin non-magnetic insulating layer (called a tunnel barrier) is sandwiched between two ferromagnetic layers. Due to the quantum tunneling effect, electrons can tunnel from one ferromagnetic layer to another through the tunnel barrier, and the magnitude of the tunneling current is related to the magnetization directions of the two ferromagnetic layers. The development of tunnel magnetometers has benefited from the progress of nanotechnology and thin film preparation technology, making it possible to prepare high-quality tunnel magnetoresistance devices.

The global tunnel magnetoresistance (TMR) market has shown a steady growth trend in the past few years. It is expected that the TMR market will continue to grow in the next few years, benefiting from its wide application in multiple fields, such as medical, automotive, consumer electronics, etc. The main driving factors of the TMR market include technological progress and the expansion of application fields. With the continuous innovation of TMR technology and the expansion of application fields, the demand for the TMR market will continue to grow. The development trend of the TMR market in the future will be mainly reflected in the following aspects: First, the continuous advancement and innovation of technology will promote the improvement of TMR products in performance, accuracy and reliability; second, the continuous

expansion of application fields, TMR products will be used in more fields; third, the continuous growth of market demand will drive the further development of the TMR market. In summary, the tunnel magnetometer (TMR) market will continue to grow in the next few years.
