Abstracts

Turbine Inlet Chilling (TIC) is a system of air conditioning for a gas turbine to maximize the gas turbine output across all ambient conditions. This system can use water or forced air as the form of cooling.

According to our (Global Info Research) latest study, the global Turbine Inlet Cooling System market size was valued at US$ 579 million in 2023 and is forecast to a readjusted size of USD 858 million by 2030 with a CAGR of 5.9% during review period.

Global Turbine Inlet Cooling System key players include Mee Industries, Johnson Controls, TAS Turbine Inlet Chilling, Mitsubishi Heavy Industries, etc. Global top four manufacturers hold a share over 55%.

North America is the largest market, with a share about 45%, followed by Europe, and Japan, both have a share over 40 percent.

In terms of product, Chiller System is the largest segment, with a share over 65%. And in terms of application, the largest application is CT Plant, followed by Industrial, etc.

This report is a detailed and comprehensive analysis for global Turbine Inlet Cooling System market. Both quantitative and qualitative analyses are presented by manufacturers, by region & country, by Type and by Application. As the market is constantly changing, this report explores the competition, supply and demand trends, as well as key factors that contribute to its changing demands across many markets. Company profiles and product examples of selected competitors, along with market share estimates of some of the selected leaders for the year 2024, are provided.

Key Features:

Global Turbine Inlet Cooling System market size and forecasts, in consumption value ($ Million), sales quantity (MW), and average selling prices (USD/KW), 2019-2030

Global Turbine Inlet Cooling System market size and forecasts by region and country, in consumption value ($ Million), sales quantity (MW), and average selling prices (USD/KW), 2019-2030

Global Turbine Inlet Cooling System market size and forecasts, by Type and by Application, in consumption value ($ Million), sales quantity (MW), and average selling prices (USD/KW), 2019-2030

Global Turbine Inlet Cooling System market shares of main players, shipments in revenue ($ Million), sales quantity (MW), and ASP (USD/KW), 2019-2024

The Primary Objectives in This Report Are:

To determine the size of the total market opportunity of global and key countries

To assess the growth potential for Turbine Inlet Cooling System

To forecast future growth in each product and end-use market

To assess competitive factors affecting the marketplace

This report profiles key players in the global Turbine Inlet Cooling System market based on the following parameters - company overview, sales quantity, revenue, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Johnson Controls, Mee Industries, TAS Turbine Inlet Chilling, Mitsubishi Heavy Industries, G?ntner, Stellar Energy, Caldwell Energy, Camfil, Donaldson, ARANER, etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Market Segmentation

+44 20 8123 2220
info@marketpublishers.com

Turbine Inlet Cooling System market is split by Type and by Application. For the period 2019-2030, the growth among segments provides accurate calculations and forecasts for consumption value by Type, and by Application in terms of volume and value. This analysis can help you expand your business by targeting qualified niche markets.

Market segment by Type

- Inlet Fogging
- Chiller System
- Evaporative Cooling
- Others

Market segment by Application

- CT Plant
- Industrial
- Others

Major players covered

- Johnson Controls
- Mee Industries
- TAS Turbine Inlet Chilling
- Mitsubishi Heavy Industries
- G?ntner
- Stellar Energy

+44 20 8123 2220
info@marketpublishers.com

Caldwell Energy

Camfil

Donaldson

ARANER

Market segment by region, regional analysis covers

North America (United States, Canada, and Mexico)

Europe (Germany, France, United Kingdom, Russia, Italy, and Rest of Europe)

Asia-Pacific (China, Japan, Korea, India, Southeast Asia, and Australia)

South America (Brazil, Argentina, Colombia, and Rest of South America)

Middle East & Africa (Saudi Arabia, UAE, Egypt, South Africa, and Rest of Middle East & Africa)

The content of the study subjects, includes a total of 15 chapters:

Chapter 1, to describe Turbine Inlet Cooling System product scope, market overview, market estimation caveats and base year.

Chapter 2, to profile the top manufacturers of Turbine Inlet Cooling System, with price, sales quantity, revenue, and global market share of Turbine Inlet Cooling System from 2019 to 2024.

Chapter 3, the Turbine Inlet Cooling System competitive situation, sales quantity, revenue, and global market share of top manufacturers are analyzed emphatically by landscape contrast.

Chapter 4, the Turbine Inlet Cooling System breakdown data are shown at the regional level, to show the sales quantity, consumption value, and growth by regions, from 2019 to 2030.

+44 20 8123 2220
info@marketpublishers.com

Chapter 5 and 6, to segment the sales by Type and by Application, with sales market share and growth rate by Type, by Application, from 2019 to 2030.

Chapter 7, 8, 9, 10 and 11, to break the sales data at the country level, with sales quantity, consumption value, and market share for key countries in the world, from 2019 to 2024.and Turbine Inlet Cooling System market forecast, by regions, by Type, and by Application, with sales and revenue, from 2025 to 2030.

Chapter 12, market dynamics, drivers, restraints, trends, and Porters Five Forces analysis.

Chapter 13, the key raw materials and key suppliers, and industry chain of Turbine Inlet Cooling System.

Chapter 14 and 15, to describe Turbine Inlet Cooling System sales channel, distributors, customers, research findings and conclusion.
