## Abstracts

The global Turbochargers market size is expected to reach \$ 51720 million by 2032, rising at a market growth of 10.3% CAGR during the forecast period (2026-2032).

Turbocharger is a type of forced induction system. Turbocharger uses the exhaust flow from the engine to spin a turbine, which in turn spins an air pump, compressing the air flowing into the engine. Turbocharger lets the engine squeeze more air into a cylinder and more air means more fuel can be added. So the engine can produce more power without increasing the engine emissions. The turbocharger has four main components, the turbine, the compressor, the control system and the bearing system.

Europe is the largest region of Turbochargers, with a market share about 40%, followed by China and North America, etc. Major players of the turbochargers market include Borgwarner Inc., Honeywell International Inc., Mitsubishi Heavy Industries Ltd, IHI Corporation, Continental AG, and Cummins Inc. The top 5 manufacturers occupied about 80% market share.

This report studies the global Turbochargers production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Turbochargers and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
