According to our (Global Info Research) latest study, the global Turbocompressor market size was valued at USD 13630 million in 2023 and is forecast to a readjusted size of USD 19850 million by 2030 with a CAGR of 5.5% during review period.

Turbocompressor or Turbocharger is a type of forced induction system. Turbocharger uses the exhaust flow from the engine to spin a turbine, which in turn spins an air pump, compressing the air flowing into the engine. Turbocharger lets the engine squeeze more air into a cylinder and more air means more fuel can be added. So the engine can produce more power without increasing the engine emissions. The turbocharger has four main components, the turbine, the compressor, the control system and the bearing system.

Global key players of turbocompressor include Garrett Motion, BorgWarner, MHI, IHI, Cummins, etc. The top five players hold a share about 69%. North America is the largest producer, has a share about 32%, followed by Europe and China, with share 26% and 22%, respectively.
