According to our (Global Info Research) latest study, the global Turnkey Project Management and Engineering Service market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period. The influence of COVID-19 and the Russia-Ukraine War were considered while estimating market sizes.

A turnkey project is a delivery method in which a contractor works with a project owner under a single contract to complete all project stages from detail engineering through construction. Turnkey projects can eliminate inconveniences for the project owner by placing responsibilities on the contractor that would otherwise fall on the owner in a traditional design-bid-build (DBB) delivery. Unlike the DBB approach, turnkey delivery methods consolidate aspects of project design, financing, procurement, subcontracts, and construction into an all-in-one solution with a single point of accountability. Turnkey delivery methods can be used for a wide range of capital projects in industries such as energy, terminals and logistics, and chemicals.
