Abstracts

The global Turnkey Project Management and Engineering Service market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A turnkey project is a delivery method in which a contractor works with a project owner under a single contract to complete all project stages from detail engineering through construction. Turnkey projects can eliminate inconveniences for the project owner by placing responsibilities on the contractor that would otherwise fall on the owner in a traditional design-bid-build (DBB) delivery. Unlike the DBB approach, turnkey delivery methods consolidate aspects of project design, financing, procurement, subcontracts, and construction into an all-in-one solution with a single point of accountability. Turnkey delivery methods can be used for a wide range of capital projects in industries such as energy, terminals and logistics, and chemicals.
