## Abstracts

According to our (Global Info Research) latest study, the global Twin Wall Polypropylene Sheet market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Corrugated plastic is usually made from polypropylene which is capable of being recycled. Fluted (corrugated) Polypropylene (PP) sheet, a polyolefin product, is a lightweight, material known for its versatility across many industries and applications. Fluted PP is used in Graphic Arts, Packaging, Agriculture, Automotive and Industrial markets. Common applications include signage, trade show and retail display, binding/stationary, crates, as separators or liners in packaging, vehicle trunk liners, and more. Sturdy, reusable, recyclable, returnable, waterproof fluted polypropylene shipping containers are superior to corrugated paper. Polypropylene offers good resistance to chemical or acid attacks and has low moisture absorption and superior electrical insulation.

Twin Wall Polypropylene Sheet (also known as corrugated plastic cardboard, corrugated plastic board sheets, coroplast sheets, waterproof cardboard, corrugated stratocore sheets) are 2 outside flat plastic sheets separated by small plastic beams running perpendicular to them. Corrugated plastic sheets come in a wide variety of colors and thicknesses. They can be fire retardant or non-fire retardant.

The market is driven by various end-user industries, such as graphic arts and signage, packaging and storage, agriculture, automotive, building and construction and so on. As the downstream consumption usually follows with developed and rapid economic growth areas, such as BRICS, the developed areas' company prefers investing to

underdevelopment regions these years.
