According to our (Global Info Research) latest study, the global Two-Component Epoxy Primer market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Two-component epoxy primer is a paint mixed with epoxy resin and curing agent. It has excellent adhesion, corrosion resistance and hardness, and is suitable for protecting various metal and non-metal surfaces. Two-component means that the paint is divided into two components. Generally, Group A is the main paint and Group B is the curing agent. When used, it must be mixed in a certain proportion before it can be cured to form a film. Two-component epoxy primer has better construction performance and durability than other types of primers.
