## Abstracts

The global Two-Component Epoxy Primer market size is expected to reach \$ million by 2030, rising at a market growth of % CAGR during the forecast period (2024-2030).

Two-component epoxy primer is a paint mixed with epoxy resin and curing agent. It has excellent adhesion, corrosion resistance and hardness, and is suitable for protecting various metal and non-metal surfaces. Two-component means that the paint is divided into two components. Generally, Group A is the main paint and Group B is the curing agent. When used, it must be mixed in a certain proportion before it can be cured to form a film. Two-component epoxy primer has better construction performance and durability than other types of primers.
